

In the Specification

Applicants submit herewith a marked-up specification and substitute specification. Paragraph numbering and section titles have been included in these specifications for convenience; references in the description to the claims have been deleted; and the Abstract has been placed on a separate sheet. The title has also been rewritten and brief descriptions of new Figs. 10 and 11 have been added.

No new matter has been added by these changes.

In the Drawings

The drawings have been amended as follows:

In Fig. 1, the cross-section designation "A-A" has been amended to read - - 2-2 - - to reflect that the cross-section is depicted in Fig. 2.

Numeral 1 identifying a link plate has been added to Figs. 1 and 2.

Figs. 3 and 4 have had the numeral 4 added to point to the entire depiction of the fixing device in those figures.

Fig. 3 has had the numeral 7 added to identify a roughly triangular-shaped receptacle.

The numeral 16 has been added to Fig. 3 to identify the stop.

New Fig. 10 is added to depict a torsional element 6 in the form of a torsion rod. No new matter is added in this figure because it was adequately described in the specification.

A new Fig. 11 has been added to illustrate a "plurality of additional chain links" as recited in claims 13 to 20. No new matter has been added with the addition of this figure.
